**Students will be learning about Place Value this month, which covers the following skills:**

- Interpret a multiplication equation as a comparison
- Recognize a digit represents 10 times the value of what it represents in the place to the right
- Name numbers within 1 million by building understanding of the place value chart and placement of commas for naming base thousand units.
- Read and write multi-digit numbers using base ten numerals, number names, and expanded form.
- Compare numbers based on meanings of the digits using  $>$ ,  $<$ , or  $=$  to record the comparison.
- Round multi-digit numbers to the thousands place using the vertical number line.
  - Use place value understanding to round multi-digit numbers to any place value using real world applications.
  - Use place value understanding to fluently add multi-digit whole numbers using the standard algorithm and apply the algorithm to solve word problems using tape diagrams.
- Solve word problems using the standard addition algorithm modeled with tape diagrams and assess

**Student of the Month Character Trait:**

**Students of the Month:**

**Baker-  
Campbell-  
Haith-  
Scott-**

**Congratulations to these students!**

the reasonableness of answers using rounding.

**Reminders:**

**Be sure to check your child's teacher's Canvas page daily for assignments and/or additional information.**

**Please have your child practice their Math and Reading skills nightly on the following websites:**

**Math:** [www.zearn.org](http://www.zearn.org)

**Language Arts:**  
[www.readworks.org](http://www.readworks.org)
