

Academy of Computer and Information Science at Northeast High

“Everyone has recognized the huge current and future need in our country for expert high technology professionals. These careers are high paying and truly rewarding.”

Larry Cecchini, ADT Cybersecurity

Students in this program will:

- Learn to interact with computers and computer systems through coding, networking, and data analytics
- Connect learning to the challenges faced by computer scientists through experiences provided by industry partners
- Graduate with industry credentials, professional and technical skills and college credits

Majors available:

- Cyber Security
- Artificial Intelligence

Who should apply:

- Rising ninth-grade students who live in the Dudley, Eastern, Grimsley, Northeast, Northern, Page and Southeast attendance zones. At this time, transportation will not be provided.
- Students interested in computer engineering, information science, cybersecurity or programming.

Post-graduation potential:

- Graduates are prepared for college majors such as cyber security, digital forensics, software engineering and management information systems.
- Students desiring to go to work immediately have training and credentials for jobs such as computer programmer, systems analyst or software developer.
- Salary potential ranges from \$58,000 per year for network support specialists to \$126,000 for information systems managers.
- Computer and Information Science is one of the fastest-growing, highest-paid professions available.
- Academy students are mentored by local college students.
- Partnered with leading companies in the computer science industry.
- Monthly events and opportunities to explore the field of computer science.
- Encourages collaboration and teamwork with diverse groups of students.
