Defining the Data Points:

- End-of-Grade (EOG) tests are state tests that are administered at the end of each school year.
- EVAAS is a program from SAS used in many districts in North Carolina. It uses the past testing history of a student to identify the probability that the student will be successful (scoring a Level IV or higher) in NC Math I.
Teams will be formed at the elementary school level to make placement decisions for middle school.
- A virtual summer bridge course will be offered to rising 8th graders to help students move from Math 7 to NC Math 1.
